Mitchell Gray

meg346@cornell.edu MitchellEGray MitchellGray100

Education

Georgia Tech, Atlanta, GA **Jan 2025 – Aug 2026**
Master's of Science, Computer Science *GPA: 4.0; Machine Learning*

Cornell University, Ithaca, NY **Aug 2020 – May 2024**
Bachelor's of Science, Computer Science *Distributed Systems*
Minor, Operations Research Information Engineering *30 Extra Graduate-Level Credits*

Knowledge Domain: Distributed Systems · Systems Programming · Databases · Cloud Computing · AI · ML

Technical Skills

Languages: C · PL/SQL · C++ · Python · Java · Rust
Software & Tools: Git · NumPy · Pandas · Poetry · CMake · CI/CD · Docker · Kubernetes · GCP · Azure · AWS · REST

Relevant Work Experience

Oracle **Redwood City, CA**
Software Developer II | **C, PL/SQL, Raft, Java, OracleDB, OCI** **May 2025 – Present**

- Working on Shard Native Replication (SNR) in the Oracle Globally Distributed Database · Implementing the **Raft** Consensus algorithm for Shard Replication · Writing Distributed Systems code in **C**, **Java**, and **PL/SQL**.

Software Developer I **June 2024 – May 2025**

- Engineered a fault-tolerant Replica replication feature on Oracle Cloud Infrastructure · Enforced placement of Raft Replicas on separate server racks to eliminate single-rack replication-unit failures and improve database availability.
- Refactored over 1,200 lines of Sharding serialization code to eliminate a critical data-loss defect · Designed robust de/serialization pipelines and multi-format conversion logic that greatly improved data integrity and system reliability.
- Optimized SNR's Replica "Copy" and "Move" operations · Resolved critical memory management issues, corrected existing logic errors, and batched I/O calls to significantly enhance reliability and throughput · Achieved a **700%** performance improvement without workload and **250%** improvement under active workloads.
- Resolved critical recoverability issue in SNR's Replica Copy/Move operations by ensuring complete transfer of essential recovery-related tables and data between Replicas · Improved reliability and system integrity during Replica failure.
- Implemented comprehensive Pluggable DBs (PDBs) lifecycle management for SNR · Enabled seamless Drop, Unplug, and Plug operations of PDBs to streamline maintenance for Sharded Databases using a multi-tenant container architecture.
- Enhanced error-handling mechanisms throughout the SNR codebase · Enabled accurate and timely error reporting even during database recovery · Optimized error-display logic and filtering, significantly streamlining database error management · Improved diagnostic speed, and simplified troubleshooting workflows for customers.

Gecko Robotics **Pittsburgh, PA**
Software Engineer Intern | **C++, Python, C, CMake, GCP, CI/CD** **May 2023 – Aug 2023**

- Worked on the Robot Controls team · Wrote code for an asynchronous distributed system in **C++**, **Python**, and **C**.
- Revamped Robot & DAQ emulators · Implemented communications protocol and Client/Server TCP networking.
- Replaced VS build-system with **CMake** · Added calibration support to emulators · Integrated **CI/CD** and **Poetry**.

CMU-Software Engineering Institute **Pittsburgh, PA**
DevOps Engineer Intern | **Python, Rust, CI/CD, Docker, Kubernetes** **May 2022 – May 2023**

- Developed **Python**, **Rust**, and **Bash** code on various NDA projects · Updated and created **CI/CD** pipelines · Created GitLab **REST API** data visualizations for clients · Used **ArgoCD** and **Helm** to deploy **AWS EKS** cluster.
- Improved efficiency of the company by using **Python**, **Neo4j**, **NeoDash**, **Confluence** Documents, and the PageRank algorithm to create scripts, metrics, and long-term documentation that are now used throughout the company.

Additional Work Experience

Georgia Tech & Cornell University **Atlanta, Georgia & Ithaca, NY**
Graduate Teaching Assistant | **Python, NumPy, SQL, Java** **Aug 2022 – Present**

- Received the **Course Staff Exceptional Service Award** · Taught Graduate AI, Databases, OOP, and Physics.

Cornell Database Group **Ithaca, NY**
Database Research Intern | **Java, AWS** **Jan 2022 – May 2024**

- Published and presented paper at **VLDB 2023** on combining Reinforcement Learning and Worst-Case Optimal Joins.
- Worked on upgrading query engine to a **Distributed Architecture** · Created dynamic statistics & RL visualizations.
