

MITCHELL GRAY

✉ meg346@cornell.edu ✉ mgray88@gatech.edu  MitchellEGray  MitchellGray100

Education

Georgia Tech, Atlanta, GA

Master's of Science, Computer Science

Jan 2025 – Aug 2026 (Part-Time)

GPA: 4.0; Artificial Intelligence

Cornell University, Ithaca, NY

Bachelor's of Science, Computer Science

Aug 2020 – May 2024

Distributed Systems

Minor, Operations Research Information Engineering

30 Extra Graduate-Level Credits

Knowledge Domain: Distributed Systems · Systems Programming · AI · Machine Learning · Databases · Cloud

Technical Skills

Languages: C · C++ · Python · PL/SQL · Java · Rust

Software & Tools: Git · Pytorch · Scikit-learn · NumPy · Pandas · Poetry · CMake · CI/CD · Docker · K8s · Azure · AWS

Relevant Work Experience

Oracle

Redwood City, CA

Software Engineer II | C, PL/SQL, Raft, Java, OracleDB, OCI

Sept 2025 – Present

- Working on Raft Replication in the Oracle Globally Distributed Database for Shard Replication · Writing fault-tolerant and scalable Distributed Systems code in **C**, **Java**, and **PL/SQL**.
- Received **Training & Mentorship Excellence Award** · Provided technical mentorship to our newest engineer.
- Designed and implemented a generic shard-operations replication framework that consolidated multiple ad-hoc code paths into a single framework · Improved maintainability, scalability, and ease of creating new operations with fewer defects.

Software Engineer I

June 2024 – Sept 2025

- Engineered a fault-tolerant replica replication feature on Oracle Cloud Infrastructure · Enforced placement of Raft replicas on separate server racks to eliminate single-rack replication-unit failures and improve database availability.
- Refactored over 1,200 lines of Sharding serialization code to eliminate a critical data-loss defect · Designed robust de/serialization pipelines and multi-format conversion logic that greatly improved data integrity and system reliability.
- Optimized multiple replica-to-replica data transfer operations · Achieved a **700%** performance improvement without workload and **250%** improvement under active workloads after optimization code changes.
- Resolved critical recoverability issue in replica-to-replica data transfer operations by ensuring complete transfer of essential recovery-related tables and data between replicas · Improved reliability and system integrity during failure.

Gecko Robotics

Pittsburgh, PA

Software Engineer Intern | C++, Python, C, CMake, GCP, CI/CD

May 2023 – Aug 2023

- Worked on the Robot Controls team · Wrote code for an asynchronous distributed system in **C++**, **Python**, and **C**.
- Revamped Robot & DAQ emulators · Implemented communications protocol and Client/Server TCP networking.
- Replaced VS build-system with **CMake** · Added calibration support to emulators · Integrated **CI/CD** and **Poetry**.

Carnegie Mellon University - Software Engineering Institute

Pittsburgh, PA

DevOps Engineer Intern | Python, Rust, CI/CD, Docker, Kubernetes

May 2022 – May 2023

- Developed **Python**, **Rust**, and **Bash** code on various NDA projects · Updated and created **CI/CD** pipelines · Created GitLab **REST API** data visualizations for clients · Used ArgoCD and Helm to deploy AWS EKS cluster.
- Improved efficiency of the company by using **Python**, **Neo4j**, NeoDash, Confluence Documents, and the PageRank algorithm to create scripts, metrics, and long-term documentation that are now used throughout the company.

Relevant Academic Work Experience

Contextual Computing Group

Atlanta, GA

Graduate Researcher | Python, Typescript

June 2025 – Present

- Paper accepted into **Learning at Scale 2026**, created a plagiarism/cheating-detection IDE.
- Used ML models to analyze behavioral data · Utilizing the tool in multiple graduate-level CS courses at Georgia Tech.

Georgia Tech & Cornell University

Atlanta, GA & Ithaca, NY

Graduate Teaching Assistant | Python, NumPy, SQL, Java

Aug 2022 – Present

- Received the **Course Staff Exceptional Service Award** · Taught Graduate AI, Databases, OOP, and Physics.

Cornell Database Group

Ithaca, NY

Database Research Intern | Java, AWS

Jan 2022 – May 2024

- Published and presented paper at **VLDB 2023** combining **Reinforcement Learning** and Worst-Case Optimal Joins.
- Worked on upgrading query engine to a **Distributed Architecture** · Created dynamic statistics & RL visualizations.
